Job and Family Services

Ted Strickland, Governor

Douglas E. Lumpkin, Director

To: Medicaid Coordinators

From: Kendallyn Markman, Senior Program Administrator

Subject: Final SFY 2010 Access and Clinical Performance Measurement Results

Date: December 6, 2010

Enclosed are the following **final** reports:

- Covered Families and Children (CFC) regional-based statewide SFY 2010 clinical performance measurement (CPM) results
- CFC regional-based statewide SFY 2010 access measure results
- Aged, Blind, and Disabled (ABD) statewide SFY 2010 CPM results
- ABD statewide SFY 2010 access measure results

The **August 2010** encounter data refresh was used to derive the final rates for CY 2009, after managed care plans (MCPs) reviewed the initial drafts based on the April encounter data refresh and submitted additional data. In addition, the MCPs reviewed the drafts based on the August encounter data refresh. The Ohio Department of Jobs and Family Services (ODJFS) responded to the MCPs comments and questions per their reconciliation workbooks for the draft results. The SFY 2010 CPM and access measure results are used in the determination of compliance with performance standards per Appendix M and N of the SFY 2010 provider agreement. A copy of the methods used to calculate the SFY 2009 ABD and CFC CPMs are available at:

http://jfs.ohio.gov/ohp/bmhc/documents/pdf/SFY10_ABD_CPM_Methods.pdf,
http://jfs.ohio.gov/ohp/bmhc/documents/pdf/SFY10_CFC_CPM_Methods.pdf,
http://jfs.ohio.gov/ohp/bmhc/documents/pdf/SFY10_ABD_Access_Methods.pdf, and
http://jfs.ohio.gov/ohp/bmhc/documents/pdf/SFY10_CFC_Access_Methods.pdf.

There were no changes between the previous draft versions of the HEDIS results and the final drafts following the MCP review process. If you have any questions or comments, please call me at 614-752-4453.

Bureau of
Health Services
Research

January through December 2009

Report Prepared by:
Kendy Markman

Issued On:
December 6, 2010

Purpose

The Ohio Medicaid program offers two major benefit packages: primary & acute care services, and long-term care services. The primary and acute care benefit package is provided through either the fee-for-service (FFS) system, or through a managed care model. The managed care model covers consumers in the Covered Families and Children program, including Healthy Start and Healthy Families, and is designed to assure access to appropriate services and quality of care for enrolled Medicaid consumers, to improve accountability, and to increase cost predictability. The Adults' Access to Preventive/Ambulatory Health Services measure is one method used to assess managed care plan (MCP) members' access to primary care services. This measure is used in conjunction with the Children's Access to Primary Care and Primary Care Provider Turnover measures to assess MCP performance in the access category.

Children's Access to Primary Care practitioners is a HEDIS 2009 measure which uses visits to primary care providers to assess access to care for children. It looks at the percentage of children who had a primary care visit and is a general indicator of the availability of services. MCPs should promote the appropriate use of primary care services and monitor PCP utilization rates to ensure that adequate access is maintained.

ODJFS Expectations

Managed care plans must meet the Minimum Performance Standard for this measure, in accordance with the MCP provider agreement, Appendix M, Performance Evaluation. The Minimum Performance Standard must be met in order to qualify for consideration of any incentives, in accordance with Appendix O, Pay-for-Performance, of the provider agreement.

The results for this measure will be used to determine if an MCP qualifies for financial incentives, in accordance with SFY2010 Appendix O, Pay-for-Performance, of the provider agreement.

Minimum Performance Standard: For SFY 2010, 84 percent of children must receive a visit.

Methods

This measure is the percentage of enrolled members age 12 months to 6 years who had a visit with an MCP primary care provider during the report period, and members age 7 to 11 years who had a visit during the reporting year or the calendar year prior to the reporting year.

Numerator: Members in the denominator age 12 months through 6 years with one or more PCP visit(s) during the reporting year, and members age 7 years to 11 years with one or more PCP visit(s) during the report period or the calendar year prior to the report period.

Denominator: Members age 12 months through 6 years who were enrolled for at least 11 months with the plan during the reporting year and who were enrolled during the last month of the reporting year, and children age 7 years to 11 years who were enrolled for at least 11 months with the plan during the reporting year and

11 months with the plan during the calendar year prior to the reporting year and who were enrolled during the last month of the reporting year.

Data Sources: Encounter data and the ODJFS Provider Master File.

Report Period:

For Contract Period	Performance Will Be Evaluated Using Report Period
SFY 2010	January thru December 2009

Codes to Identify Ambulatory/Preventive Care Visits		
Description	CPT Codes	ICD-9-CM Codes
Evaluation/Management Codes & Preventive Medicine Codes	99201-99205, 99211-99215, 99241-99245, 99341-99350, 99381-99385*, 99391-99395*, 99401-99404, 99411, 99412, 99420, 99429	
General Medical Examination		V20.2, V70.0, V70.3, V70.5, V70.6, V70.8, V70.9

* CPT codes specific to adolescent age stratification (12-19) added for informational purposes only

Exclusions:

- 1) Inpatient services and emergency department visits.

In some cases, the provider number given on the encounter data claim is the provider number of the hospital where the physician provides services and is not the provider number of the individual physician who provided the services. Therefore, ODFJS' Provider Master File is used to identify PCPs for this measure:

Codes to Identify Primary Care Providers	
Provider Type	Provider Specialty Code ¹
01 (General Hospital)	01 (General Practice)
04 (Outpatient Health Facility)	11 (Allergy)
05 (Rural Health Facility)	12 (Cardiovascular)
07 (Advanced Practice Nurse Group)	14 (Gastroenterology)
09 (Maternal/Child Health Clinic – 9 mo.)	15 (Internal Medicine)
12 (Federally Qualified Health Center)	16 (Pediatrics)
50 (Comprehensive Clinic)	18 (Preventive Medicine)
52 (Public Health Dept. Clinic)	19 (Pulmonary Diseases)
65 (Clinical Nurse Specialist)	21 (Child Psychiatry)
71 (Certified Nurse Midwife)	22 (Neurology)
72 (Nurse Practitioner)	23 (Psychiatry)
	53 (Obstetrics & Gynecology)
	56 (Otolaryngology)
	59 (Urology)

CFC Children's Access to Primary Care

January – December 2009

	71 (Obstetrics & Gynecology – Osteopath) 72 (Ophthalmology / Otolaryngology (Osteopath) 75 (Psychiatry Neurology (Osteopath) 99 (Other, Unspecified)
--	---

If a provider is identified on the ODJFS' Provider Master File with any of the Provider Type or Provider Specialty Codes listed in the table above, then they will be recognized as a PCP.

¹Missing Provider Specialty Code: If a child received an ambulatory/preventive care visit and the servicing provider's specialty code is missing from ODJFS' Provider Master File the visit will be included in the measure if the servicing provider has a provider type per the ODJFS' Provider Master File of individual physician (20), group physician (21), individual osteopath (22) or group osteopath (23).

Results

The percentage of children, age 12 months to 11 years, who had a primary care visit in CY 2009 was 88 percent for all MCPs, compared to 88 percent for the 2009 National Medicaid HEDIS average. Six out of 7 MCPs’ reported results met or exceeded the national Medicaid HEDIS 2009 average in the 12 to 24 months age group. Additionally, 4 out of 7 MCPs’ reported results met or exceeded the national Medicaid HEDIS 2009 average in the 25 months to 6 years age group and 3 out of 7 MCPs’ reported results met or exceeded the national Medicaid HEDIS 2008 average for the 7 to 11 years age group.

Children’s Access to Primary Care CY 2009

¹The ‘12 to 24 months’, ‘25 months to 6 years’, and ‘7 to 11 years’ age groups are provided for informational purposes only.

²The ‘BMC Medicaid HEDIS Weighted Mean’ weights the 2009 National HEDIS mean using the Ohio enrollment data in order to achieve a mean that closely resembles the Ohio population.

³Weighted average, based on MCP member month totals by HEDIS age group.

For Informational Purposes Only

For informational purposes only, the '12 to 19' year age group rates were calculated and included in this section of the CY 2009 Access to Primary Care for Children. According to the 'Center for Adolescent Health' at Case Western University, as a child enters adolescence, health risks such as injuries, violence, alcohol, tobacco, and drug use, sexual behaviors, nutrition, and physical activity need to be closely monitored in order to improve health outcomes for this age group. Access to preventative and primary health care can assist with early identification and coordination of care needed for this particular age group.

As of 2004, HEDIS added the adolescent age stratification (12 to 19 years) to their 'Access to Primary Care' measure. BMHC agrees it is imperative to measure and monitor access to primary care for this age group, thus it is included in this reporting period for the MCPs information only.

Children's Access to Primary Care Ages 12 to 19 years CY 2009

Report Prepared by:
Kendy Markman

Issued On:
December 6, 2010

Purpose

The Ohio Medicaid program offers two major benefit packages: primary & acute care services, and long-term care services. The primary and acute care benefit package is provided through either the fee-for-service (FFS) system, or through a managed care model. The managed care model covers consumers in the Covered Families and Children program, including Healthy Start and Healthy Families, and is designed to assure access to appropriate services and quality of care for enrolled Medicaid consumers, to improve accountability, and to increase cost predictability. The Adults' Access to Preventive/Ambulatory Health Services measure is one method used to assess managed care plan (MCP) members' access to primary care services. This measure is used in conjunction with the Children's Access to Primary Care and Primary Care Provider Turnover measures to assess MCP performance in the access category.

Adults' access to preventive/ambulatory health services is a HEDIS 2009 measure which indicates whether adults are getting preventive and ambulatory health services from MCP providers. It looks at the percentage of adults who had a preventive or ambulatory visit during the reporting period. As with children, adults must be ensured adequate access to primary care services. The ambulatory and preventive health services included in this measure are the most frequent entry points into the health care system and their accessibility should be monitored to ensure there are no barriers to receiving care.

ODJFS Expectations

Managed care plans must meet an Interim Minimum Performance Standard for this measure, in accordance with the MCP provider agreement, Appendix M, Performance Evaluation. The Interim Minimum Performance Standard must be met in order to qualify for consideration of any incentives, in accordance with Appendix O, Pay-for-Performance, of the provider agreement.

The results for this measure will be used to determine if an MCP qualifies for financial incentives and/or additional monetary rewards, in accordance with SFY2010 Appendix O, Pay-for-Performance, of the provider agreement.

Minimum Performance Standard: For SFY 2010, 75 percent of adults age 20 and older must receive a visit.

Methods

This measure is the percentage of enrolled members age 20 and older who had an ambulatory or preventive-care visit.

Numerator: Adults age 20 and older with one or more preventive related visit(s) during the reporting year.

Denominator: Adults age 20 and older who were enrolled for at least 11 months with the plan during the reporting year and who were enrolled during the last month of the reporting year.

Results

The percentage of adults, age 20 and older, who had a preventive/ambulatory health visit in CY 2009 was 85 percent for all MCPs, compared to 80 percent for the 2009 National Medicaid HEDIS average. Results for the 20 and older age group ranged from 81 percent for Amerigroup to a high of 86 percent reported for CareSource and Paramount. For each MCP, the results for the 20 to 44 age group met or were higher than the 2009 National Medicaid HEDIS average of 80 percent. Individual MCP results for the 45 to 64 age group ranged from 82 percent for Amerigroup to 89 percent for Paramount, with two of seven MCPs meeting or exceeding the national average of 86 percent for this age group.

Report Prepared by:
Kendy Markman

Issued On:
December 6, 2010

Purpose

The Ohio Medicaid program offers two major benefit packages: primary & acute care services, and long-term care services. The primary and acute care benefit package is provided through either the fee-for-service (FFS) system, or through a managed care model. The managed care model covers consumers in the Aged, Blind, or Disabled (ABD) program and is designed to assure access to appropriate services and quality of care for enrolled Medicaid consumers, to improve accountability, and to increase cost predictability. The Members' Access to Preventive/Ambulatory Health Services measure is one method used to assess managed care plan (MCP) members' access to primary care services. This measure is used in conjunction with Members' Access to Designated Primary Care Provider and Primary Care Provider Turnover measures to assess MCP performance in the access category.

Members' Access to Preventive/Ambulatory Health Services is a HEDIS 2009 measure which indicates whether adult members are getting preventive and ambulatory health services from MCP providers. It looks at the percentage of members who had a preventive or ambulatory visit during the reporting period. Adults must be ensured adequate access to primary care services. The ambulatory and preventive health services included in this measure are the most frequent entry points into the health care system and their accessibility should be monitored to ensure there are no barriers to receiving care.

ODJFS Expectations

Managed care plans must meet an Interim Minimum Performance Standard for this measure, in accordance with the MCP provider agreement, Appendix M, Performance Evaluation. The Minimum Performance Standard must be met in order to qualify for consideration of any incentives, in accordance with Appendix O, Pay-for-Performance, of the provider agreement.

The results for this measure will be used to determine if an MCP qualifies for financial incentives and/or additional monetary rewards, in accordance with SFY2010 Appendix O, Pay-for-Performance, of the provider agreement.

Minimum Performance Standard: For SFY 2010, 78 percent of adults age 20 and older must receive a visit.

Methods

This measure is the percentage of members who had an ambulatory or preventive-care visit.

Numerator: Members in the denominator with one or more preventive related visit(s) during the reporting year.

Denominator: Members who were enrolled for at least 11 months with the plan during the reporting year and who were enrolled during the last month of the reporting year.

Data Sources: Encounter data and the ODJFS Provider Master File.

Results

The percentage of members, age 20 and older, who had a preventive/ambulatory health visit in CY 2009 was 89 percent for all MCPs, compared to 83 percent for the 2009 Medicaid HEDIS weighted mean. Results ranged from 85 percent for Buckeye to a high of 91 percent for CareSource. The results for the 20 to 44 age group ranged from 78 percent for Buckeye to 86 percent for CareSource, with four out of five MCPs meeting or exceeding the 2009 National Medicaid HEDIS mean of 80 percent. For the 45 to 64 age group results, each MCP met or exceeded the 2009 National Medicaid HEDIS mean of 86 percent.
