The State of Ohio is an equal opportunity employer that promotes diversity, inclusion and workplaces free from discrimination, harassment, or retaliation due to: race, color, religion, sex/gender, national origin (ancestry), disability, age (40 years of age or older), genetic information, sexual orientation, military status, gender identity or expression, parental status as a parent during pregnancy and immediately after the birth of a child, parental status as a parent of a young child and parental status as a foster parent.

Gain real life work experience within your desired career field!

We offer paid undergraduate and graduate internships. Our undergraduate interns start at \$14.72 an hour and our graduate interns start at \$17.91.

We provide opportunities for interns to collaborate and support each other to promote team building within the workplace.

“ *The Medicaid Internship Program diversified my perspective and my career goals. I started the internship knowing very little about the complex healthcare industry. As an intern in the fiscal office, I developed my financial and database skills, but I also learned about healthcare delivery and the opportunities that exist in the industry. I'm inspired to continue in the field and to improve the healthcare system!* ”

Haden K. Finance Intern

“ *My internship experience at ODM taught me so much about all the work that goes into making Medicaid run. I was able to attend meetings and work on projects that helped me become a mini expert in certain areas. The internship was also very flexible towards my ever-changing class schedule, which served as an amazing support system for being able to balance being a full time grad student and an intern.* ”

Xhonela S. Managed Care Intern
