Welcome to Electronic Visit Verification!

Electronic Visit Verification (EVV) is an electronic system that verifies when provider visits occur and documents the precise time services begin and end. This will help assure you are receiving the care required to maintain your health and your caregivers are paid for the services rendered. As an individual who receives home and community services through the Ohio Medicaid program, you are receiving this EVV device to enable you to be our partner in ensuring services are accurate and verified.

This packet contains your EVV device, charging cable, and a quick reference card for you and your provider. The instructions below will help you to charge the device so that it is ready to begin using. If you use a cell phone, you will find the EVV device pretty easy to use.

Your Device

Charging Port:

You will find the charging port on the bottom of the device.

Insert the charger into the port, and plug your charging cable into the wall. It may take several minutes to charge your device.

Power Button:

To turn on the device, push the button on the upper right-hand side of the device.

Make sure the device is plugged in and has had several minutes to charge before powering it on. When powering on, the device may show the camera flash as part of its diagnostics, the camera is disabled when complete.

Figure 1: Power Button on the right, charger port on the bottom

Figure 2: Power Button on Back

You may have received an alternate LG Device. The power button for this device is located on the back.

Have your EVV device charged and ready prior to the start of your Provider visit. Your Provider has been trained on use of the EVV Device and will use it to confirm the visit.

Questions?

Have your service provider contact the EVV Provider Hotline at 1-855-805-3505.
