

Department of Medicaid

John R. Kasich, Governor
Barbara R. Sears, Director

September 26, 2018

After considering provider feedback and reviewing the impact of the recently implemented edits related to EVV, ODM has decided to change those edits. As originally implemented, the edits required that the units on the claim match the units recorded in the EVV system for the visit exactly. ODM is now working with Sandata to change those edits so that a match will be found when the units on the claim are equal to or less than the units recorded in the EVV system. **Due to this change, ODM will not begin to deny claims due to EVV related edits for dates of service on and after November 14, 2018.** Providers must continue to log visit data with EVV for all Phase 1 services as required by Ohio Administrative Code Rule 5160-1-40.

Please watch the [ODM EVV website](#) and look for additional communication in the future with information regarding the planned date for implementation of the revised edits.

Please send any questions or concerns to EVVPolicy@medicaid.ohio.gov.
