## Total cost of care performance tied to payment

### Performance of your CPC practice - Informational only

## Shared savings payment calculation <sup>1</sup>

Component	Your practice	Description
A. Total cost of care performance	-	Risk-adjusted total cost of care for the performance period per member per month (PMPM)
B. Target total cost of care	-	Risk-adjusted baseline total cost of care PMPM, further adjusted for programmatic changes over time
C. Savings percentage	-	Savings as a percentage of Target TCOC, calculated as (Target TCOC - TCOC performance) / Target TCOC
D. Gain sharing rate	-	Percent of savings to be distributed as shared savings payment, determined by baseline performance and CPC track. Only CPC entities with Savings percentage 1% will be eligible for shared savings
E. Panel size (member months) for shared savings determination	-	Total member months for members attributed to the CPC entity for at least 6 months in the performance period
F. Shared savings payment based on self-improvement	-	Shared savings payment calculated as (Non-risk adjusted Target TCOC * Panel size * Savings percentage * Gain sharing rate)
G. Shared savings payment for practices with lowest total cost of care	-	Bonus payment for the decile of CPC entities with the lowest TCOC performance, calculated as (Panel size * Pre-determined PMPM bonus payment)
<b>Potential total shared savings</b>	-	<b>Shared savings payment calculated as (Shared savings based on self - improvement + Shared savings payment for practices with lowest TCOC)</b>

<sup>1</sup> Potential shared savings is not calculated for the quarterly progress report.  
<sup>2</sup> Values are not final.
