

## National Provider Identifier and Taxonomy Guidance for providers of ODA Waiver Services

In accordance with Administrative Code rule 5160-1-17, all providers with an available taxonomy are required to have a National Provider Identifier (NPI) on file with ODM. This includes certified providers of waiver services through the Ohio Department of Developmental Disabilities (DODD), the Ohio Department of Aging (ODA), and providers of state plan services through the Ohio Department of Medicaid (ODM).

The NPI is a number unique to an individual or organization and is utilized in program integrity measures such as provider screening and business processes such as claims processing. When requesting an NPI, at least one taxonomy must be selected to identify the type of organization, practitioner or services provided. Multiple taxonomies may be associated with a single NPI. For individuals and organizations who do not already have an NPI, this guide identifies some of the taxonomies available to choose from when requesting an NPI.

Providers who request an NPI should select the taxonomy which most closely describes the type of organization, practitioner, or services provided by the applicant. Practitioners who hold a professional license should select a taxonomy that best describes that licensure. Additional taxonomies may be selected depending on individual circumstances and services provided.

Please note: This is for informational purposes only and does not represent all available taxonomies. For a full list of available taxonomies, refer to National Uniform Claim Committee (NUCC) guide found here:

<https://www.nucc.org/index.php/code-sets-mainmenu-41/provider-taxonomy-mainmenu-40/pdf-mainmenu-53>.

More information can be found here on the ODM website:
