

**Wound Care Certification Grant
Quarterly Progress Report
To the Ohio Department of Medicaid
First Quarter 2018**

Data Analysis Summary

The Ohio Health Care Association (OHCA) is pleased to report to the Ohio Department of Medicaid (ODM) that we are continuing to monitor the available, publicly reported data to analyze the effectiveness of the wound-care training grant.

Our data analysis focuses on whether the participating skilled nursing centers achieve improvement in the Centers for Medicare and Medicaid Services pressure ulcer Quality Measures (QMs) during the period that they use a certified wound-care specialist. The wound-care training funded by the grant was completed in August 2016. There is up to a six-month lag from the end of a calendar quarter to publication of the QM data for that quarter.

The parameters for the data analysis are as follows:

- Centers are included in the analysis only as long as they continue to employ the certified wound-care nurse. OHCA designed a data table listing each certified wound-care nurse and the facility through which they were trained. OHCA contacts each of these facilities to ensure the nurse's continued employment before including the center in the quarterly report.
- OHCA utilizes the last pre-training quarter (first quarter of 2016) as the baseline quarter.
- OHCA uses only the long-stay pressure ulcer QM for the analysis.
- OHCA separates the centers whose nurses attained certification into two groups: Group A, facilities in the bottom 25% of centers with data reported in Nursing Home Compare for the baseline quarter; and Group B, centers not in the bottom 25%.

As of the date of this report (first quarter 2018), the most recent, publicly available, long-stay pressure ulcer QM data are from the third quarter of 2017. The findings of our latest analysis are presented in the following paragraphs.

A total of 61 centers remain in the project, which means the nurse who received wound-care certification through the grant is still employed by the facility. Twenty-one of the remaining centers are in Group A; 40 are in Group B.

The remaining centers have experienced improved results on the long-stay pressure ulcer QM over the duration of the project. The pressure ulcer percentages have decreased for both Group A and Group B from the baseline quarter to third quarter 2017. For Group A, the median score declined from 11.4% to 6.19%, while Group B saw a reduction in the median score from 3.61% to 3.46%.

On a quarter-over-quarter basis comparing Q2 2017 to Q3 2017, the median long-stay pressure ulcer QM for Group A moved from 7.0% to 6.19%, while for Group B, it rose slightly from 3.2% to 3.46%. The state and national averages for Q3 2017 were 5.0% and 5.6%, respectively.

The attached Excel workbook contains supporting data. The first tab shows all Ohio skilled nursing facilities with their third quarter 2017 long-stay pressure ulcer data. The second tab lists the remaining facilities in Group A. The third tab contains the remaining facilities in Group B.

OHCA will continue to monitor whether or not the certified wound-care nurses are employed at each facility as well as to review and report the latest pressure-ulcer data in the coming quarters.
