

## Ohio Medicaid Budget Variance Report – June 2018

The Ohio Medicaid Budget Variance Report provides a monthly review of actual Medicaid expenditures compared to the budget enacted by the Ohio General Assembly (HB 49). Budget projections are based on Ohio Department of Medicaid (ODM) estimates of disbursements and policies enacted in HB 49, including vetoes and veto overrides, and Controlling Board approved funds set aside in the Health and Human Services Fund to offset the 651525 line.

- For FY2018 the total variance of the Medicaid Program was \$678.7 million (-2.5 percent) under the \$27 billion dollar estimate. In June, total Medicaid payments were lower than projected by \$130.5 million (-6.1 percent). This was driven by underspending in both fee for service and managed care.
- The variances were spread across all categories, however the larger variance in the fee for service category is due to underspending in the Medicaid School Program and lower than projected FFS enrollment. The FFS variance grew in the second half of the fiscal year, after managed care day one implementation in January. Total ODM Medicaid actual expenditures of combined FFS and Managed Care payments ended the fiscal year \$287.6 million (-1.4 percent) under budget. The variance was driven by lower than projected caseload.
- The state share of general revenue fund (GRF) spending in the 651525 line item finished the fiscal year only \$33.5 million under the estimate of \$3.759 billion. FY18 ended much closer to the disbursement estimate than the two previous budgets (see the table below). This is important because the state share of 651525 is the source of funding available to ODM for provider payments. The federal share underspending occurred as a result of the lower than projected federal pass through payments for the Medicaid School Program and the federal share adjustment that occurred in November related to Controlling Board approval.

### Ohio Medicaid Flash Report Variance (Appropriation Line Item 651525)

- Overall [caseload](#) is 186,076 (-6.0 percent) under estimates for the month of June. The covered families and children (CFC) enrollment was below projections (-6.4 percent), but the impact on the budget was partially offset because the higher-cost Medicaid only aged, blind and disabled (ABD) category that ended the year above projections (4.1 percent). Underspending that would have been generated by the lower-than-projected caseload has been utilized to reduce provider rate cuts and cancel the June fee for service payment delay.
