HIPAA Transaction Standard Companion Guide

Refers to the Implementation Guides Based on ASC X12 version 005010

837 Professional Health Care Claim for Fee-For-Service

This Companion Guide has been developed in coordination with the new Ohio Medicaid Enterprise System (OMES) and provides trading partners information needed to meet future OMES EDI requirements. Trading Partners should not use the instructions in this Companion Guide to submit production files until the official implementation of the new OMES.

Preface

This Companion Guide to the 5010 ASC X12N Technical Report Type 3 Implementation Guides and associated errata and addenda adopted under Health Insurance Portability and Accountability Act (HIPAA) clarifies and specifies the data content when exchanging electronically with ODM. Transmissions based on this companion guide, used in tandem with 005010 ASC X12 TR3 Implementation Guides, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N TR3 Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the TR3 Implementation Guides.

1 INTRODUCTION

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA will be detailed with the use of a table. The tables contain a row for each segment that ODM has something additional, over, and above, the information in the IGs. That information can:

1. Limit the repeat of loops, or segments
2. Limit the length of a simple data element
3. Specify a sub-set of the IGs internal code listings
4. Clarify the use of loops, segments, composite, and simple data elements
5. Any other information tied directly to a loop, segment, composite, or simple data element pertinent to trading electronically with ODM

In addition to the row for each segment, one or more additional rows are used to describe ODM's usage for composite and simple data elements and for any other information. Notes and comments should be placed at the deepest level of detail. For example, a note about a code value should be placed on a row specifically for that code value, not in a general note about the segment.

The following table specifies the columns and suggested use of the rows for the detailed description of the transaction set companion guides.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
193	2100C	NM1	Subscriber Name			This type of row always exists to indicate that a new segment has begun. It is always shaded at 10% and notes or comment about the segment itself goes in this cell.
195	2100C	NM109	Subscriber Primary Identifier		15	This type of row exists to limit the length of the specified data element.
196	2100C	REF	Subscriber Additional Identification			
197	2100C	REF01	Reference Identification Qualifier	18, 49, 6P,HJ, N6		These are the only codes transmitted by ODM.
			Plan Network IdentificationNumber	N6		This type of row exists when a note for a particular code value is required. For example, this note may say that value N6 is the default. Not populating the first 3 columns makes it clear that the code value belongs to the row immediately above it
218	2110C	EB	Subscriber Eligibility or Benefit Information			
231	2110C	EB13-1	Product/Service ID Qualifier	AD		This row illustrates how to indicate a component data element in the Reference column and also, how to specify that only one code value is applicable.

1.1 SCOPE

ODM developed 5010 Companion Guides to supplement each 5010 Transaction Implementation Guide, based on Version 5, Release 1, with regards to:

- Specific Codes and/or Values that ODM will default on Outbound Transactions
- Specific Codes and/or Values that are unique to ODM to accept an Inbound Transaction

ODM Companion Guides will not create a Non-Compliant Transaction

This companion guide is intended to be used in conjunction with the ASC X12N/005010X222A1 Implementation Guide (IG). It provides supplementation instructions not included in the IG that must be followed for implementation and conducting the transaction with ODM. It does not change the requirements of the IG in any way.

1.2 OVERVIEW

The Health Insurance Portability and Accountability Act (HIPAA) require all Providers, Trading Partners and Payers in the United States to comply with the Electronic Data Interchange (EDI) Standards for Health Care.

The ASC X12 HIPAA 837 Health Care Claim: Professional Implementation Guide presents the basic requirements for planning and implementing an EDI-based system for the exchange of ASC X12 HIPAA compliant transactions with the Ohio Medicaid Enterprise System (OMES). In order to create a HIPAA compliant transaction, you must first meet the requirements of the ASC X12 HIPAA 837 Professional Implementation Guide and then incorporate the ODM specific requirements.

The segments and elements used in this document are necessary for the ODM adjudication system for Professional Claims.

6 CONTROL SEGMENTS/ENVELOPES

6.1 ISA-IEA

This section describes ODM's use of the interchange control segments. It includes a description of expected sender and receiver codes, authorization information, and delimiters.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
C.3		ISA	Interchange ControlHeader			
C.4		ISA01	Authorization Information Qualifier	00		No Authorization Information Present (No Meaningful Information in ISA02)
C.4		ISA03	Security Information Qualifier	00		No Security Information Present (NoMeaningful Information in ISA04)
C.4		ISA05	Interchange IDQualifier	ZZ		Mutually Defined
C.4		ISA06	Interchange Sender ID			7-digit Trading Partner ID assigned by ODM. This is a fixed-length field and should be left justified and filled with spaces to meet the minimum length requirement of 15.
C.4		ISA07	Interchange IDQualifier	ZZ		Mutually Defined
C.4		ISA08	Interchange ReceiverID	MMISODJFS 0021920 0002937 0004202 0003150 0021919 0007316 0007610 0021914		This is a fixed-length field and should be left justified and filled with spaces to meet the minimum length requirement of 15. All ODM Trading Partner IDs should be 7-digits which include leading zeros. MMISODJFS = Ohio Department of Medicaid Fee-for-Service 0021920 = AmeriHealth Caritas Ohio, Inc. 0002937 = Anthem Blue Cross Blue Shield 0004202 = Buckeye Community Health Plan 0003150 = CareSource 0021919 = Humana Health Plan of Ohio, Inc. 0007316 = Molina Healthcare of Ohio

All rights reserved. This document may be copied.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
						0007610 = United Healthcare Community Plan of Ohio, Inc 0021914 = Aetna OhioRISE
C.5		ISA13	Interchange ControlNumber			Must be identical to the associated interchange control trailer IEA02
C.6		ISA14	Acknowledgm ent Requested	0		No Interchange Acknowledgment Requested

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
C.10		IEA	Interchange ControlTrailer			
C.10		IEA01	Number of Included Functional Groups			Number of included functional groups.
C.10		IEA02	Interchange ControlNumber			The control number assigned by the interchange sender. Must be identical to the value in ISA13.

6.2 GS-GE

This section describes ODM's use of the functional group control segments. It includes a description of expected application sender and receiver codes. Also included in this section is a description concerning how ODM expects functional groups to be sentand how ODM will send functional groups. These discussions will describe how similar transaction sets will be packaged and ODM's use of functional group control numbers.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
C.7		GS	Functional GroupHeader			
C.7		GS02	Application Sender'sCode			7-digit Trading Partner ID assigned by ODM
C.7		GS03	Application Receiver'sCode			
C.8		GS06	Group Control Number			Must be identical to the value in GE02.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
C.9		GE	Functional GroupTrailer			
C.9		GE01	Number of Transaction Sets Included			Number of included transaction sets.

2022 © ODM
All rights reserved. This document may be copied.

C.9		GE02	Group Control Number			The functional group control number.Must be the same value as GS06.

6.3 ST-SE

This section describes how ODM uses transaction set control numbers. ODM limits the number of inquiries per ST-SE to 5,000.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
70		ST	Transaction SetHeader			
70		ST02	Transaction SetControl Number			Identical to the value in SE02

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
496		SE	Transaction SetTrailer			
496		SE01	Number of IncludedSegments			Total number of segments included in a transaction set including ST and SE segments
496		SE02	Transaction SetControl Number			Transaction set control number. Identical to the value in ST02.

7 PAYER SPECIFIC BUSINESS RULES AND LIMITATIONS

In order to submit 837 Professional X12 transactions, Trading Partners must be certified by Ohio Medicaid and in active status. These details are documented in the Trading Partner Information Guide which can be found at this link - Trading Partners | Medicaid (ohio.gov).

Effective July 1st, 2018, based on the CMS rule (CMS-6010-F) titled “Medicare and Medicaid Programs; Changes in Provider and Supplier Enrollment, Ordering and Referring, and Documentation Requirements; and Changes in Provider Agreements”, ODM requires FQHCs (provider type 12), RHCs (provider type 5), OHFs (provider type 4), AHCCs (provider type 50), and freestanding birth centers (provider type 11) to submit claims with the NPI of the individual rendering provider. At the claim header level, this information is reported in the 2310B loop while at the detail level, it is the 2420A loop.

Behavioral Health (BH) Reimbursement Rule, OAC 5160-27-03 claims for dates of service prior to 7/1/22 must include the following:

1. The PWK segment in the 2300 loop of the 837 Professional claim. Use form identifier ODM99999. A certification statement uploaded via the MITS provider portal found here: https://portal.ohmits.com/public/Providers/tabid/43/Default.aspx.
2. The MOA segment in the 2320 loop with Remittance Advice Remark Codes (RARC) – M32 and N215.
3. The CAS segment in the 2320 loop must include the following Claim Adjustment Reason Code (CARC):

CARC 209 - Per regulatory or other agreement. The provider cannot collect this amount from the patient. However, this amount may be billed to subsequent payer. Refund to patient if collected. (Use only with Group code OA)

The CMS authority governing this temporary TPL bypass is ending effective 7/1/2022. All claims attempting to utilize this bypass with dates of service subsequent to this date will be denied.

8 ACKNOWLEDGEMENTS AND/OR REPORTS

8.1 The TA1 Technical Acknowledgement

The TA1 allows the receiver of a file to notify the sender that an invalid interchange structure was received or that problems were encountered. The TA1 verifies only the interchange header (ISA/GS) and trailer (IEA/GE) segments of the file envelope.

For batch and real-time transactions, if ISA or GS errors were encountered then the generated TA1 report with the Interchange Header errors will be returned for pickup.

8.2 The 999 Implementation Acknowledgement

Each time a properly formatted 5010 X12 file is submitted to Ohio Medicaid, a 999 acknowledgement is returned to the submitter.

8.3 824 Application Advice

For batch transactions, the 824 application advice is used to report the rejection of a transaction that does not meet WEDI SNIP Type 7 compliance.

8.4 Report Inventory

If a 5010 X12 file fails compliance, an HTML report file is returned to the submitter. This file contains details that will assist the submitter to identify the issue and correct the problem.

10 TRANSACTION SPECIFIC INFORMATION

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA will bedetailed with the use of a table. The tables contain a row for each segment that ODM has something additional, over and above, the information in the IGs. That information can:

1. Limit the repeat of loops, or segments
2. Limit the length of a simple data element
3. Specify a sub-set of the IGs internal code listings
4. Clarify the use of loops, segments, composite, and simple data elements
5. Any other information tied directly to a loop, segment, composite, or simple data element pertinent to trading electronically with ODM

In addition to the row for each segment, one or more additional rows are used to describe ODM's usage for composite and simple data elements and for any other information. Notesand comments should be placed at the deepest level of detail. For example, a note about a code value should be placed on a row specifically for that code value, not in a general note about the segment.

All rights reserved. This document may be copied.

Page #	Loop ID	Reference	Name	Codes	Length	Notes/Comments
						in 2330B for all services on the claim must be submitted (AMT 2320). If the payer in 2330B adjudicated the claim at the claim/header level, the associated Adjustment Code Group (s), Adjustment Reason Code(s) and Amount(s) must be submitted in this loop/segment. If the payer in 2330B adjudicated the claim at the detail level (i.e., made line payments and/or made line adjustments that caused the line payment to differ from the line billed charges), the 2430 loop must be completed. If the payer in 2330B adjudicated the claim at the detail, but made some adjustments at the header/claim level that caused the claim payment to differ from the sum of the line payments, the 2320 CAS must be submitted in addition to the appropriate adjustments made in 2430 CAS. COB balancing rules apply and may be enforced (See IG Balancing).

469	2420F	REF02	Referring Provider Secondary Identifier			The 7-digit OMES Provider ID must be used.
484	2430	CAS	Line Adjustment			Medicaid is the payer of last resort. The claim must first be adjudicated by all payers submitted in the 2330B loop before submitting the claim to ODM, unless an exception set forth in Rule 5160-1-05 or 5160-1-08 of the Ohio Administrative Code applies. The total amount paid by the payer in 2330B for all services on the claim must be submitted (AMT 2320). If the payer in 2330B adjudicated the claim at the detail level (i.e., made line payments and/or made line adjustments that caused the line payment to differ from the line billed charges), the 2430 loop must be completed. If the payer in 2330B adjudicated the claim at the detail but made
