The County Type is based upon the 2013 NCHS Urban-Rural Classification Scheme for Counties. The National Center for Health Statistics' (NCHS) Urban-Rural Classification Scheme for Counties was developed for use in studying associations between urbanization level of residence and health and for monitoring the health of urban and rural residents. These are defined as following:

- * Large central metro: Counties in metropolitan statistical areas (MSAs) of 1 million or more population that 1) Contain the entire population of the largest principal city of the MSA, or 2) Have their entire population contained in the largest principal city of the MSA, or 3) Contain at least 250,000 inhabitants of any principal city of the MSA.
- * Large fringe metro: Counties in MSAs of 1 million or more population that did not qualify as large central metro counties.
- * Medium metro: Counties in MSAs of populations of 250,000 to 999,999.
- * Small metro: Counties in MSAs of population less than 250,000.
- * Micropolitan: Counties in MSAs.
- * Noncore: Nonmetropolitan counties that did not qualify as micropolitan.
